

1/3/13

Dear Barbara Webber,

Ashton Colantonio is an 8-year old boy diagnosed with Pulmonary Hypertension (lung disease) and Atypical Rett's Syndrome. Ashton has severe developmental delays and is coping with seizures on daily basis. In the past 8 years Ashton has spent numerous weeks in the PICU at the Children's Hospital of Buffalo. He just had a feeding tube procedure at CHOB to help him with his nutritional needs. This has been a challenging and stressful time for our entire family and we appreciate your generosity by donating a Wal-Mart, Tops Markets, and Tim Horton's gift cards to us through Stone Buddies. Thank you so much and you are a blessing to our family during this difficult time.

Sincerely,
Maria, Jeff, Ashton Colantonio
